

Magic Fingers™

BED RELAXATION SYSTEM

PATENT PENDING

EASY INSTALLATION INSTRUCTIONS

Congratulations!
on your purchase of Magic
Fingers Bed Relaxation System.
Soon you will experience a
relaxing, soothing sleep
environment.

Please read the entire
instruction manual before
installing Magic Fingers.

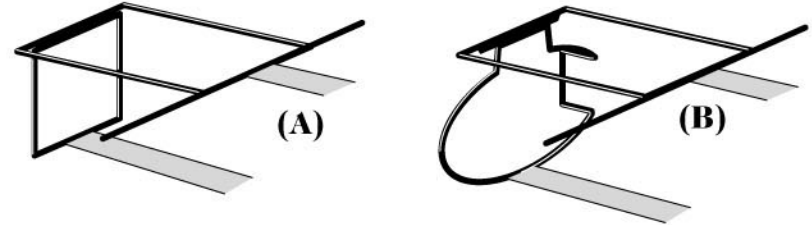

Welcome...

Your Magic Fingers Bed Relaxation System consists of:

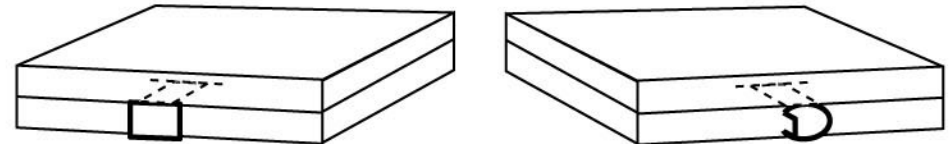

- The digital, hand-held clock timer
- Bed massaging motor unit
- Two metal brackets with nylon straps
- Four nylon fasteners

INSTALLATION INSTRUCTIONS

Step 1. Slide nylon strap set attached to the "T" shaped brackets ends between boxspring and mattress

Brackets (A) and (B) should be placed on each side of boxspring with bracket bottoms facing down so that the second nylon strap set can attach around the underneath of the boxspring. Hang each at 90 degree angle draped over each side of boxspring. Pull strap end at buckle until each side is firmly in place as shown below:

Step 2. Slide motor unit (C) into bracket (B) with BOTTOM of unit against boxspring.
Note: Be sure to insert so that power and timer cords are located into notched oval bracket cutout.

Step 3. With unit held securely in place with fastened upper nylon straps, attach underneath strap around bottom of box spring, insert into buckle and tighten until the entire unit is firmly in place. **NOTE:** Do not overly tighten straps - clasp may disconnect from the buckle. If this occurs, loosen straps, refasten and try again.

Note: for increased vibration or to reduce vibrational noise, secure bottom oval strap behind motor base and over front of housing before attaching to underneath straps
